NEW QUESTION: 1

A. Option C

B. Option E
C. Option D
D. Option A
E. Option B
Answer: C,E
Explanation:
http://www.oracle.com/us/products/applications/fusion/supply-ch
ain-management/fusion-product-hub-ds-1555656.pdf

NEW QUESTION: 2
Which three are among the various tasks performed by the data
Guard Monitor (DMON) process?
A. activating role-based services appropriately in the various
database instances of the configuration, based on the database
role
B. communicating with the DMON process of the observer to
monitor a primary database in case a fast start failover is
required.
C. maintaining information about all members of the broker
configuration in binary configuration files
D. communicating with DMON processes in other database
instances that are part of the broker configuration
E. performing role transitions when switchover requests are
made
Answer: C,D,E
Explanation:
Explanation/Reference:
A: Oracle Enterprise Manager Cloud Control (Cloud Control)
works with the Oracle Data Guard monitor to automate and
simplify the management of an Oracle Data Guard configuration.
With Cloud Control, the complex operations of creating and
managing standby databases are simplified through Oracle Data
Guard management pages and wizards, including:
* A switchover operation that helps you switch roles between
the primary database and a standby database.
B (not D): The Oracle Data Guard monitor process (DMON) is an
Oracle background process that runs on every database instance
that is managed by the broker.
E: The broker's DMON process persistently maintains information
about all members of the broker configuration in a binary
configuration file.
