#### **NEW QUESTION: 1**

The finance department works with a bank which has recently had a number of cyber attacks. The finance department is concerned that the banking website certificates have been compromised. Which of the following can the finance department check to see if any of the bank's certificates are still valid?

- A. Bank's recovery agent
- B. Bank's CRL
- C. Bank's key escrow
- D. Bank's private key

**Answer: B**

**Explanation:**

The finance department can check if any of the bank's certificates are in the CRL or not. If a certificate is not in the CRL then it is still valid.

The CRL (Certificate revocation list) is exactly what its name implies: a list of subscribers paired with digital certificate status. The list enumerates revoked certificates along with the reason(s) for revocation. The dates of certificate issue, and the entities that issued them, are also included. In addition, each list contains a proposed date for the next release.

**NEW QUESTION: 2**

Joe, an employee, contacts the database administrator about an issue with a local database on his hard drive. Which of the following questions would be MOST helpful in determining the next step in troubleshooting?

- A. Is there a connection to the Internet?
- B. What is the state of the database service?
- C. What is the error message being received?
- D. What is the password being used to access the database?

**Answer: C**

**NEW QUESTION: 3**

Your solution is producing performance bugs in production that you did not see in staging and test environments. You want to adjust your test and deployment procedures to avoid this problem in the future. What should you do?

- A. Deploy smaller changes to production.
- B. Deploy changes to a small subset of users before rolling out to production.
- C. Deploy fewer changes to production.
- D. Increase the load on your test and staging environments.

**Answer: B**

**NEW QUESTION: 4**

Which HP switching feature allows a network administrator to virtualize the switching Hardware to logically manage one switch?

- A. GVRP
- B. Distributed trunking
- C. MSTP
- D. IRF

**Answer: D**
