Download the free trial for Fortinet NSE6\_FVE-5.3 exam preparation material now, Our company's experts are daily testing our NSE6\_FVE-5.3 learning materials for timely updates.

#### **NEW QUESTION: 1**

On the CMA you see a warning next to an endpoint in the Endpoint > Monitor View page and the Device Status says 'Credentials Required', How can you resolve this?

- A. Restart the endpoint
- B. Click Edit and enter the username and password
- C. Delete and re-add the endpoint
- D. Re-register the endpoint to the gatekeeper

**Answer: B**

#### **NEW QUESTION: 2**

A solutions architect has created a new AWS account and must secure AWS account root user access Which combination of actions will accomplish this? (Select TWO.)

- A. Ensure the root user uses a strong password
- B. Enable multi-factor authentication to the root user
- C. Add the root user to a group containing administrative permissions.
- D. Store root user access keys in an encrypted Amazon S3 bucket

**E.** Apply the required permissions to the root user with an inline policy document

**Answer: B,C**

**NEW QUESTION: 3**

Which stakeholder analysis technique shows stakeholders that fall outside the scope of the solution but still interact with it in some way?

- A.** Interview
- B.** Scope modeling
- C.** Risk analysis
- D.** Process modeling

**Answer: B**

Explanation:

Explanation/Reference:

Scope modeling shows stakeholders that fall outside the scope of the solution but still interact with it in some way. Scope models are used to describe the scope of analysis or the scope of a solution. It serves as a basis for defining and delimiting the scope of business analysis and project work.

D is incorrect. Process modeling can be a source for identifying additional stakeholders, since related processes may be affected.

A is incorrect. Risk analysis is the study of the probability, impact, and scoring of identified risk

events. Risk analysis is the science of risks and their probability and evaluation in a business or a process.

It is an important factor in security enhancement and prevention in a system. Risk analysis should be performed as part of the risk management process for each project. The outcome of the risk analysis would be the creation or review of the risk register to identify and quantify risk elements to the project and their potential impact.

B is incorrect. Interviews are useful for collecting requirements and for identifying other stakeholders. An interview is a systematic approach. It is used for eliciting information from a person or a group of people in an informal or formal setting by talking to an interviewee, asking relevant questions, and documenting the responses. Interviewees are also able to identify other stakeholders.

**NEW QUESTION: 4**

A bank has decided to outsource some existing IT functions and systems to a third party service provider. The third party service provider will manage the outsourced systems on their own premises and will continue to directly interface with the bank's other systems through dedicated encrypted links. Which of the following is critical to ensure the successful management of system security concerns between the two

organizations?

- A. BIA
- B. BPA
- C. MOU
- D. SOA
- E. ISA

**Answer: E**

Explanation:

An interconnection security agreement (ISA) is a security document that details the requirements for establishing, maintaining, and operating an interconnection between systems or networks. It specifies the requirements for connecting the systems and networks and details what security controls are to be used to protect the systems and sensitive data.
