NEW QUESTION: 1
Refer to the exhibit.

Which contains a Performance SLA configuration.
An administrator has configured a performance SLA on FortiGate. Which failed to generate any traffic. Why is FortiGate not generating any traffic for the performance SLA?
A. The Ping protocol is not supported for the public servers that are configured.
B. Participants configured are not SD-WAN members.
C. There may not be a static route to route the performance SLA traffic.
D. You need to turn on the Enable probe packets switch.
Answer: B

NEW QUESTION: 2
Which of the following risks is not greater in an electronic
funds transfer EFT environment than in a manual system using
paper transactions?
A. Higher cost per transaction.
B. Duplicate transaction processing.
C. Inadequate backup and recovery capabilities.
D. Unauthorized access and activity.
Answer: A
Explanation:
EFT is a service provided by financial institutions worldwide
that is based on EDI technology. EFT transaction costs are
lower than for manual systems because documents and human
intervention are eliminated from the transactions process.

NEW QUESTION: 3
What fields are used to define static or dynamic list of values
in web forms in Process Cloud Service?
A. Date, Time and Number Fields
B. Text Input and Area Fields
C. Links, Email and Message Fields
D. Checklists, Radio button or Select controls
Answer: D
Explanation:
Explanation
To configure static and dynamic list of values (for checklist,
radio button and select controls):
* From the Basic Palette, drag and drop a checklist, radio
button or select control onto the canvas.
* Select the control and configure its static list of values on
the Properties pane General tab.
* Go to Option Source and click Static.
* In the Option Names field, enter a label to display for each
option.
* In the Option Values field, enter an internal value for each
option.
* Specify a default value from the option values available in
the Default Value field.
* Select an option in the Autofocus field to make that option
the selected option when the form loads.
* Optionally, configure dynamic list of values for the
checklist, radio button or select control. There are two
options to configure dynamic list of values.
* Specify that the control's options should come from a list of
value data attributes defined in the Data definition pane.
* Click From Data
* Select the list of values options source from available
attributes in the Options List field.
* Specify a default value from the options available in the
Default Value field.
* Select an option in the field to make that option the

selected option when the form loads.
* Specify that the control's options should come from a REST connector created for the application.
* Click Connector
* Specify the connector settings in the Connector, Resource and Operation fields and map response settings. See Populating Controls Using RESTCalls.
* Select an option in the Autofocus field to make that option the selected option when the form loads.
* Click Preview to try out using the control.
