NEW QUESTION: 1You administer an Azure SQL Database that runs in the S0 service tier. The database stored mission-critical data. You must meet the following requirements: minimize costs associated with hosting the database in Azure; minimize downtime in the event of an outage; protect the database from unplanned events. What should you do?
A. Use backups in a geo-redundant Azure storage (GRS) location.
B. Create a continuously replicated copy.
C. Implement a secondary database in the paired region.
D. Ensure that a secondary databases are online and readable at all times.
Answer: C
Explanation:

Explanation/Reference: Explanation: An example of a paired region solution is Azure SQL Database Geo-Replication: you can configure asynchronous replication of transactions to any region in the world; however, Microsoft recommends you to deploy these resources in a paired region for most disaster recovery scenarios. NEW QUESTION: 4 Which of the following exemplifies proper separation of duties?
A. Tape operators are permitted to use the system console.
B. Console operators are permitted to mount tapes and disks.
C. Operators are not permitted modify the system time.
D. Programmers are permitted to use the system console.
Answer: C
Explanation: This is an example of Separation of Duties because operators are prevented from modifying the system time which could lead to fraud. Tasks of this nature should be performed by they system administrators. AIO defines Separation of Duties as a security principle that splits up a critical task among two or more individuals to ensure that one person cannot complete a risky task by himself. The following answers are incorrect:
Programmers are permitted to use the system console. Is incorrect because programmers should not be permitted to use the system console, this task should be performed by operators. Allowing programmers access to the system console could allow fraud to occur so this is not an example of Separation of Duties.
Console operators are permitted to mount tapes and disks. Is incorrect because operators should be able to mount tapes and disks so this is not an example of Separation of Duties.
Tape operators are permitted to use the system console. Is incorrect because operators should be able to use the system console so this is not an example of Separation of Duties.
