Answer:
Explanation:

Explanation

Box 1:

To monitor threats by using sensors, you would use Azure Advanced Threat Protection (ATP).

Azure Advanced Threat Protection (ATP) is a cloud-based security solution that leverages your on-premises Active Directory signals to identify, detect, and investigate advanced threats, compromised identities, and malicious insider actions directed at your organization.

Sensors are software packages you install on your servers to upload information to Azure ATP.

Box 2:

To enforce MFA based on a condition, you would use Azure Active Directory Identity Protection.

Azure AD Identity Protection helps you manage the roll-out of Azure Multi-Factor Authentication (MFA) registration by configuring a Conditional Access policy to require MFA registration no matter what modern authentication app you are signing in to.

NEW QUESTION: 2

Rick works as a Sales Manager for Tech Perfect Inc. He is creating a report in Excel 2010. He has entered data in five worksheets in a workbook. He wants to enter a disclaimer message in the A1 cell of each sheet in the workbook as shown in the image given below: Which of the following is the easiest way to accomplish the task?

A. Write a disclaimer message in the A1 cell of the first sheet.

In the other sheets, insert a formula that points to the A1 cell of the first worksheet.

B. Write a disclaimer message in the A1 cell of the first sheet.

Copy the disclaimer message and paste it on the remaining sheets.

C. Select all the five sheets.

Write a disclaimer message in the A1 cell of the active sheet.

D. Select all the five sheets. Click the first sheet.

Write a disclaimer message in the A1 cell of the active sheet.

Answer: C

Explanation:

In order to accomplish the task, Rick should take the following steps: Select all the five sheets.

Write a disclaimer message in the A1 cell of the active sheet.

Grouping of sheets is a feature provided in Microsoft Office

Excel 2010. Selecting more than one sheet groups those sheets. When multiple sheets are grouped, data that a user enters or edits in the active sheet is reflected in all sheets in the group. To select all sheets, right-click a sheet tab, and then click Select All Sheets on the shortcut menu.

Users can select multiple sheets by holding the Ctrl key while clicking the sheets. Answer option C is incorrect. Clicking the first sheet after selecting all sheets will ungroup the sheets and the message will only get inserted in the first sheet. Answer options B and A are incorrect. Both these options will work, but Rick will have to work more than required. Grouping sheets is a better option to work simultaneously on multiple sheets. Users can select multiple sheets by holding the Ctrl key while clicking the sheets. Answer option C is incorrect. Clicking the first sheet after selecting all sheets will ungroup the sheets and the message will only get inserted in the first sheet. Answer options B and A are incorrect. Both these options will work, but Rick will have to work more than required. Grouping sheets is a better option to work simultaneously on multiple sheets.

NEW QUESTION: 4

Your network contains an Active Directory domain named contoso.com. The domain contains 200 servers that run either Windows Server 2012 R2, Windows Server 2012, or Windows Server 2008 R2. The servers run the following enterprise applications:

Microsoft Exchange Server 2013

Microsoft SQL Server 2014

System Center 2012 R2 Operations Manager is deployed to the domain. Operations Manager monitors all of the servers in the domain. Audit Collection Services (ACS) is installed.

You need to recommend a monitoring strategy for the domain that meets the following requirements:

A group of administrators must be notified when an error is written to the System log on the servers that run Exchange Server 2013.

A group of administrators must be notified when a specific event is written to The Application log on the servers that run SQL Server 2014.

What is the best approach to achieve the goal? More than one answer choice may achieve the goal. Select the BEST answer.

- A. From Operations Manager, implement two monitors.
- B. From Operations Manager, implement two rules.
- C. From Computer Management, implement one event subscription.
- D. From Operations Manager, enable audit collection.

Answer: B
