NEW QUESTION: 1Which access policy determines whether or not interfaces will be members of the same virtual port channel in ACI environment?**A.** interface selector**B.** port channel**C.** port channel member**D.** policy group**Answer: C**

NEW QUESTION: 2Testlet: Humongous InsuranceYou need to recommend a BitLocker recovery method that meets the company's technical requirements.Which recovery method should you recommend?Testlet: Humongous Insurance (Case Study): COMPANY OVERVIEWHumongous Insurance has a main office and 20 branch offices. The main office is located in New York. The branch offices are located throughout North America. The main office has 8,000 users. Each branch office has 2 to 250 users.PLANNED CHANGESHumongous Insurance plans to implement Windows BitLocker Drive Encryption (BitLocker) on all servers.EXISTING ENVIRONMENTThe network contains servers that run either Windows

Server 2003, Windows Server 2008, or Windows Server 2008 R2. All client computers run either Windows 7 Enterprise or Windows Vista Enterprise. BUSINESS GOALS Humongous Insurance wants to minimize costs whenever possible. EXISTING ACTIVE DIRECTORY/DIRECTORY SERVICES The network contains a single Active Directory forest named humongousinsurance.com. The forest contains two child domains named north.humongousinsurance.com and south.humongousinsurance.com. The functional level of the forest is Windows Server 2008 R2. EXISTING NETWORK INFRASTRUCTURE Each child domain contains a Web server that has Internet Information Services (IIS) installed. The forest root domain contains three Web servers that have IIS installed. The Web servers in the forest root domain are configured in a Network Load Balancing (NLB) cluster. Currently, all of the Web servers use a single domain user account as a service account. Windows Server Update Services (WSUS) is used for company-wide patch management. The WSUS servers do not store updates locally. The network contains Remote Desktop servers that run Windows Server 2008 R2. Users in the sales department access a line-of-business Application by using Remote Desktop. Managers in the sales department use the Application to generate reports. Generating the reports is CPU intensive. The sales managers report that when many users are connected to the servers, the reports take a long time to process. Humongous Insurance has the following standard server builds: Class 1 - Dual x64 CPUs, 4-GB RAM, Windows Web Server 2008 R2 Class 2 - Dual x64 CPUs, 4-GB RAM, Windows Server 2008 R2 Standard Class 3 - Quad x64 CPUs, 8-GB RAM, Windows Server 2008 R2 Standard Class 4 - Quad x64 CPUs, 8-GB RAM, Windows Server 2008 R2 Enterprise CURRENT ADMINISTRATION MODEL Humongous Insurance currently uses the following technologies to manage the network: Microsoft Desktop Optimization Pack Microsoft Forefront End Point Protection Microsoft System Center Operations Manager Microsoft System Center Configuration Manager TECHNICAL REQUIREMENTS Humongous Insurance must meet the following technical requirements: A certificate must be required to recover BitLocker-protected drives. Newly implemented technologies must minimize the impact on LAN traffic. Newly implemented technologies must minimize the storage requirements. The management of disk volumes and shared folders must be performed remotely whenever possible. Newly implemented technologies must minimize the amount of bandwidth used on Internet connections. All patches and updates must be tested in a non-production environment before they are applied to production servers. Multiple versions of a Group Policy object (GPO) must be maintained in a central archive to facilitate a roll back required. The management of passwords and service principal names (SPNs) for all service accounts must be automated whenever possible. **A.** A recovery password stored in Active Directory **B.** A recovery key **C.** A recovery password printed and stored in a secure location **D.** A data recovery agent **Answer: D** Explanation: Explanation/Reference: RECOVERY OF BITLOCKER-PROTECTED DRIVE BitLocker-protected drive can be

recovered by Data Recovery Agent (with corresponding DRA certification) and recovery information backup to Active Directory. The latter one can save either recovery passwords only, or recovery passwords & key packages (i.e. certification). DRA is the only available option to fulfill the technical requirement (A certificate must be required to recover BitLocker-protected drives)
