**NEW QUESTION: 1**

A Chief Information Security Officer (CISO) is running a test to evaluate the security of the corporate network and attached devices. Which of the following components should be executed by an outside vendor?

- A. Vulnerability assessment
- B. Tabletop exercises
- C. Blue-team operations
- D. Penetration tests

**Answer: D**

**NEW QUESTION: 2**

You are a licensing specialist. Your customer is Alpine Ski House, a small manufacturer of winter sportswear.

Company Background

Alpine Ski House sells sportswear to outlets in the United

States and Canada. Alpine Ski House has 200 sales representatives.

#### Network Description

Each sales representative has a portable computer and a handheld device. Alpine Ski House purchased 100 new portable computers for the sales force less than 60 days ago.

These new computers had Microsoft Windows XP Professional and Microsoft Office 2003 Professional preinstalled.

The company has 80 desktops in the main office. These desktops are older PCs running Windows 98 and Office 97 Professional.

#### Current Licensing Solution

In July 2002, Alpine Ski House purchased licenses and Software Assurance for Windows 98 and Office Professional on the desktops through the Open License program. No upgrades have been installed, due to the hardware constraints of the older desktops.

#### Business Goals

Alpine Ski House plans to launch an online store to expand its business into the worldwide market.

The company plans to update its server environment with the following software:

Windows Server 2003

Microsoft Exchange Server 2003

Microsoft SharePoint Portal Server 2003

Microsoft SQL Server 2000, for its online store

The company plans to replace the 100 older portable computers within the next year.

The company wants to continue to increase sales by effectively servicing existing customers and by expanding its customer base without adding employees.

The company president wants to standardize all software on the desktops and the portable computers, but he does not want to spend budget on upgrading the 80 noncritical desktops.

#### End of repeated scenario

You need to recommend a change in the software acquisition process for Alpine Ski House.

Which factor has the greatest influence on the need to change?

**A.** the need for easy administration and cost-effectiveness

**B.** expanding the customer base

**C.** setting up an online store

**D.** the need to identify opportunities to increase sales

**Answer: A**

#### NEW QUESTION: 3

EC2 instances in a VPC. The instances are running Windows Server 2003. The instances are connected to the Internet through a NAT gateway. The instances are running a web application that requires access to the Internet. The application uses a database that is hosted on Amazon RDS. The database instance is in a different VPC. The application needs to connect to the database instance. Which of the following is the most secure and cost-effective way to connect the application to the database instance?
