**NEW QUESTION: 1**

When EIGRP is used as the IPv4 PE-CE protocol, which two requirements must be configured before the BGP IPv4 address family can be configured? (Choose two.)

- A. the loopback interface
- B. the route distinguisher
- C. the router ID
- D. the virtual routing and forwarding instance

**Answer: B,D**

Explanation:

A VRF must be created, and a route distinguisher and route target must be configured in order for the PE routers in the BGP network to carry EIGRP routes to the EIGRP CE site. The VRF must also be associated with an interface in order for the PE router to send routing updates to the CE router. Prerequisites Before this feature can be configured, MPLS and CEF must be configured in the BGP network, and multiprotocol BGP and EIGRP must be configured on all PE routers that provide VPN services to CE routers.

**NEW QUESTION: 2**

Your network contains 50 servers that run Windows Server 2008 Service Pack 2 (SP2) and 50 servers that run Windows Server 2008 R2.

You plan to implement Windows Server 2012 R2.

You need to create a report that includes the following information:

The servers that run applications and services that can be moved to Windows Server 2012 R2

The servers that have hardware that can run Windows Server 2012 R2

The servers that are suitable to be converted to virtual machines hosted on Hyper-V hosts that run

Windows Server 2012 R2

Solution: From an existing server, you run the Microsoft Application Compatibility Toolkit (ACT).

Does this meet the goal?

**A.** No

**B.** Yes

**Answer: A**

Explanation:

Explanation/Reference:

Explanation:

With the ACT, you can:

Analyze your portfolio of applications, websites, and computers

Evaluate operating system deployments, the impact of operating system updates, and your

compatibility with websites

Centrally manage compatibility evaluators and configuration settings

Rationalize and organize applications, websites, and computers

Prioritize application compatibility efforts with filtered reporting

Add and manage issues and solutions for your enterprise-computing environment

Deploy automated mitigations to known compatibility issues

Send and receive compatibility information from the Microsoft Compatibility Exchange

**NEW QUESTION: 3**

Which file format is used to export data from a Power BI dashboard?

- A. .xml
- B. .xls
- C. .json
- D. .csv

**Answer: D**

**NEW QUESTION: 4**

You create a Power BI dashboard that displays data from Dynamics 365 Customer Engagement.

You need to share the Power BI dashboard with coworkers.

What are three possible ways to achieve the goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Create a Power BI workspace and grant coworkers permissions.
- B. Embed reports in your company's internal web portal.
- C. Export the data to Microsoft Excel for coworkers to import and view in Power BI.
- D. Publish the dashboard as an app to your coworkers.
- E. Export the data into Common Data Service for others to manipulate in Power BI.

**Answer: A,B,D**

Explanation:

A: Basic Sharing for Dashboards and Reports through a workspace is the most common way of sharing the Power BI content. Basic Sharing is very simple and easy to use method. You can simply click on the Share button in the dashboard or report, and then share it with other users.

B: Apps are great sharing method for multiple environment, and best way of sharing for users in production environment. Power BI App is the solution for multiple environment approach.

With Power BI App, your development environment (workspace), and user environment (App) are isolated from each other. Note: If you are using SharePoint online as a portal for document management and some other reasons already, then consider using Embed in SharePoint Online feature of Power BI reports. This method is secure and you can share the report only with Power BI users you want.

E: Sometimes, you don't need a secure way of sharing, you may search for an easy and free way of sharing, and your content is not confidential or sensitive. Publish to web is your friend in such situation. This is the only free way of sharing in Power BI, but be aware that this method is not secure.

Publish to web method, gives you an embed code, which you can use in any web pages to embed the Power BI report in it
