#### **NEW QUESTION: 1**

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a

live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided. Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab. You may now click next to proceed to the lab.

Your organization has an office in Seattle.

You plan to create 100 users who will work in the Seattle office. The city attribute for all the users will be Seattle. You need to create a group named Group1 that will automatically contain all the Seattle office users.

**Answer:**

Explanation:

You need to create a Dynamic group. User accounts with the city attribute set to 'Seattle' will automatically be added to the group.

1. Go to the Azure Active Directory admin center.
2. Select Azure Active Directory then select Groups.
3. Click on the New Group link.
4. Give the group a name such as Seattle Users.
5. Select Users as the membership type.
6. Select 'Add dynamic query'.
7. Select 'City' in the Property drop-down box.
8. Select 'Equals' in the Operator drop-down box.
9. Enter Seattle as the Value. You should see the following text in the Expression box: `user.city -eq "Seattle"`
10. Click Save to create the group.
