The study materials from our company can help you get the PT0-002 certification in a short time, However, it is not so easy to pass the exam and get the certificates.

It is only available in English.

#### **NEW QUESTION: 1**

A user needs to expand the functionality of a laptop to Include additional sound, Ethernet, display, and USB ports. Which of the following connection types would support this?

- A. Micro USB
- B. USB-C
- C. Mini USB
- D. USB-A

**Answer: D**

#### **NEW QUESTION: 2**

A company hosts a static website within an Amazon S3 bucket. A solutions architect needs to ensure that data can be recovered in case of accidental deletion.

D18912E1457D5D1DDCBD40AB3BF70D5D

Which action will accomplish this?

- A. Enable Amazon S3 Intelligent-Tiering.

- B. Enable Amazon S3 cross-Region replication.
- C. Enable an Amazon S3 lifecycle policy
- D. Enable Amazon S3 versioning

**Answer: D**

Explanation:

Data can be recover if versioning enable, also it provide a extra protection like file delete, MFA delete. MFA Delete only works for CLI or API interaction, not in the AWS Management Console. Also, you cannot make version DELETE actions with MFA using IAM user credentials. You must use your root AWS account. <https://aws.amazon.com/blogs/security/securing-access-to-aws-using-mfa-part-3/> Object Versioning Use Amazon S3 Versioning to keep multiple versions of an object in one bucket. For example, you could store my-image.jpg (version 111111) and my-image.jpg (version 222222) in a single bucket. S3 Versioning protects you from the consequences of unintended overwrites and deletions. You can also use it to archive objects so that you have access to previous versions.

You must explicitly enable S3 Versioning on your bucket. By default, S3 Versioning is disabled. Regardless of whether you have enabled Versioning, each object in your bucket has a version ID. If you have not enabled Versioning, Amazon S3 sets the value of the version ID to null. If S3 Versioning is enabled, Amazon S3 assigns a version ID value for the object. This value distinguishes it from other versions of the same key.

### **NEW QUESTION: 3**

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it As a result these questions will not appear in the review screen.

You are planning the deployment of DNS to a new network. You have four internal DNS servers configured as shown in the following table.

The contoso.com zone contains zone delegations for east.contoso.com, west.contoso.com, and south.contoso.com All the DNS servers use root hints. You need to ensure that all the DNS servers can resolve the names of all the internal namespaces and Internet hosts.

Solution: On Server2, you create a conditional forwarder for contoso.com and west.contoso.com. On Server3, you create a conditional forwarder for contoso.com and east.contoso.com.

**A. No**

B. Yes

**Answer: A**

**NEW QUESTION: 4**

Exhibit

A. C

B. A

C. B

D. D

**Answer: B**
