NEW QUESTION: 1

The performance of the business analysis team has been reviewed by management to determine areas for improvement. The manager would like to help the business analysts (BAs) develop their skills and address the corrective actions.

What is a technique that may help achieve this goal?

- A. Weekly meetings
- B. Team building
- C. Lessons learned
- D. Team restructure

Answer: C

NEW QUESTION: 2

You have an Azure DevOps organization named Contoso and an Azure subscription.

You use Azure DevOps to build a containerized app named App1 and deploy App1 to an Azure container instance named ACM.

You need to restart ACI1 when App1 stops responding.

What should you do?

- A. Use IP flow verify in Azure Network Watcher.
- B. Use Connection Monitor in Azure Network Watcher.
- C. Add a liveness probe to the YAML configuration of Appl.
- D. Add a readiness probe to the YAML configuration of Appl.

Answer: D

Explanation:

Explanation

For containerized applications that serve traffic, you might want to verify that your container is ready to handle incoming requests. Azure Container Instances supports readiness probes to include configurations so that your container can't be accessed under certain conditions. The readiness probe behaves like a Kubernetes readiness probe. For example, a container app might need to load a large data set during startup, and you don't want it to receive requests during this time.

YAML is used to setup a liveness probe.
