NEW QUESTION: 1 In which two ways does Cisco Business Edition 6000 deployment mitigate and reduce the business risk? (Choose two)
A. Cisco Collaboration Architecture supports all major operating systems and devices, minimizing the risk of a device not being supported
B. Cisco proprietary communications protocols mitigate the risk of interoperability with other vendor collaboration devices
C. The end-to-end Cisco collaboration solution eliminates the risk of other vendor applications and devices not being supported
D. Cisco Jabber uses a consistent user interface on all devices. Changing devices does not impact user acceptance
Answer: A, D

NEW QUESTION: 2

Microsoft Azure SQL Database is a fully managed, cloud-based relational database service. It is designed to be easy to use, scale, and manage. It supports the Transact-SQL (T-SQL) query language and provides a rich set of features for managing your database. It is available in multiple regions and is highly available and disaster recovery ready. It is also integrated with other Microsoft services, such as Azure Active Directory and Azure Key Vault. It is a fully managed service, which means that Microsoft handles all the underlying infrastructure and maintenance tasks, so you can focus on your data and applications. It is also a serverless service, which means that you only pay for the resources you use. It is a fully managed, cloud-based relational database service.
