Those considerate services are thoughtful for your purchase experience and as long as you need us, we will solve your problems, If you are satisfied with our TVB-201 latest dumps, you can rest assured to buy it.

NEW QUESTION: 1 You have multiple Layer 3 VPNs supporting your various customers. Some of the customers use overlapping IP address space. What is used to ensure each customer's prefixes are unique?
A. route distinguisher
B. route target
C. BGP communities
D. MP-BGP
Answer: A
Explanation: Explanation/Reference: A route distinguisher (RD) distinguishes one set of routes (one VRF) from another. It is a unique number prepended to each route within a VRF to identify it as belonging to that particular VRF or customer. An RD is carried along with a route via MP-BGP when exchanging VPN routes with other PE routers.
Incorrect Answers: A: Route targets can be used to share routes.

NEW QUESTION: 2 What does letter of agreement include?
A. Goal and budget
B. Project description and signature
C. Reports and communication plan
D. Meeting information and feedback
Answer: A
Explanation: As I understand it, Memorandum of Understanding (MOU) and Letter of Intent/Agreement (LOI/LOA) are all precontract agreement that will authorize the beginning of work before the actual contract is signed. I would think that a LOA should have the goal and the budget, indicating how much money

is available to begin the work. So answer is C. The answer cannot be A or D, because that does not authorize the beginning of work. B or the actual project description and the signature should be part of the actual contract.

NEW QUESTION: 3A group of Amazon EC2 instances have been configured as high performance computing (HPC) cluster. The instances are running in a placement group, and are able to communicate with each other at network of up to 20 Gbps. The cluster needs to communicate with a control EC2 instance outside of the placement group. The control instance has the same instance type and AMI as the other instances, and is configured with a public IP address. How can the Solutions Architect improve the network speeds between the control instance and the instances in the placement group?**A.** Terminate the control instance and relaunch in the placement group.**B.** Ensure that the instances are communicating using the private IP addresses.**C.** Ensure that the control instance is using an Elastic Network Adapter.**D.** Move the control instance inside the placement group.**Answer: B**Explanation:
