**Answer: C**

Explanation:

Explanation

Reboot Instance is not performed by AS. Only termination.

References:

**NEW QUESTION: 2**

A storage networking device has experienced a failure that has

"phone home" and opened a service request for a part that can be a customer replaceable unit (CRU). Your support vendor has dispatched a replacement part using a secure courier service. According to SNIA Storage Security Best Current Practices, which statement is correct about the repair process?

- A.** The data center operations staff should accept the part and place it in a secure staging area awaiting a qualified administrator to perform the installation.
- B.** Any data center operator on-site should perform the part installation bringing the fastest resolution to the failure.
- C.** The support vendors parts courier should coordinate with a field service staff person from your support vender; both should have access to the secure data center to facilitate an unattended part swap-out.
- D.** The support vendor's parts courier should have access to the secure data center to facilitate an unattended part swap-out bringing the fastest resolution to the failure.

**Answer: A**

### **NEW QUESTION: 3**

Match each application to its Dynamics 365 licensing plan. To answer, drag the appropriate licensing plan from the column on the left to its application on the right. Each licensing plan may be used once, more than once, or not at all. NOTE: Each correct match is worth one point.

**Answer:**

Explanation:

### **NEW QUESTION: 4**

Consider the following code:

```
URL:http://www.certified.com/search.pl?
```

```
text=&lt;script&gt;alert(document.cookie)&lt;/script&gt;
```

If an attacker can trick a victim user to click a link like this, and the Web application does not validate input, then the victim's browser will pop up an alert showing the users current set of cookies. An attacker can do much more damage, including stealing passwords, resetting your home page, or redirecting the user to another Web site.

What is the countermeasure against XSS scripting?

- A.** Create an IP access list and restrict connections based on port number
- B.** Replace "&lt;" and "&gt;" characters with "&amp; l t;" and "&amp; g t;" using server scripts
- C.** Disable Javascript in IE and Firefox browsers
- D.** Connect to the server using HTTPS protocol instead of HTTP

**Answer: B**
