If you really intend to pass the 1Z0-1045-21 exam, our software will provide you the fast and convenient learning and you will get the best study materials and get a very good preparation for the exam.

1Z0-1045-21 exam materials will ensure you that you will be paid back in full without any deduction, For exam candidates like you it is of great importance to pass the Oracle exams effectively.

For one thing, the most advanced operation system in our company which [CTFL-AuT Valuable Feedback](#) can assure you the fastest delivery speed, and your personal information will be encrypted automatically by our operation system.

Our 1Z0-1045-21 guide questions are compiled and approved elaborately by experienced professionals and experts.

#### **NEW QUESTION: 1**

Which three steps must be completed to configure Fast Connection Failover for the CRM service with an Oracle Call Interface client?

**A.** Ensure that the CRM service has Advanced Queuing notifications enabled by setting the services values of AQ\_HA\_NOTIFICATIONS to TRUE.

For example:

```
$ srvctl modify service -d crm -s gl.us.oracle.com \  
-q TRUE -P BASIC -e SELECT -z 180 -w 5 -j LONG
```

- B. Enable OCI\_EVENTS on the client at environment creation time by using the OCIEnvCreate(...) function.
- C. Client applications must be linked with the client thread or operating system library.
- D. Use Oracle Call Interface to configure UP events for the service.

**Answer: A,B,C**

Explanation:

Configuring FCF for OCI Clients

OCI applications must connect to an Oracle RAC instance to enable HA event notification.

Furthermore, these applications must perform the following steps to configure FCF for an OCI client:

Configure the service for your OCI connection pool to enable connection load balancing and runtime connection load balancing. Also configure the service to have Advanced Queuing

notifications enabled, as shown in the following example:

```
$ srvctl modify service -d crm -s ociapp.example.com -q TRUE -B THROUGHPUT -j LONG
```

Set the context of the environment for OCI calls on the client to enable subscriptions by using the

OCIEnvCreate() call, setting the MODE parameter value to OCI\_EVENTS, as follows:

```
(void) OCIEnvCreate(&myenvhp, OCI_EVENTS|OCI_OBJECT, ...);
```

Link the application with a thread library.

After linking with the thread library, the applications can register a callback that is invoked whenever a FAN event occurs.

## NEW QUESTION: 2

You are maintaining an ASP.NET MVC application that runs on Azure. Remote debugging is enabled for this role, but the input endpoints for remote debugging have been removed for security reasons. You do not have permission to view the Azure Portal for this deployment. You can log on by using Remote Desktop Protocol (RDP).

You must attach the input endpoints to enable remote debugging. You need to add the input endpoints to enable remote debugging. Which file should you modify?

- A. E:\entrypoint.txt
- B. C:\Config\<GUID>.ccf
- C. E:\ <GUID>.csman
- D. C:\Config\<DeploymentD>.WebRole.1xml

**Answer: C**

**NEW QUESTION: 3**

In Microsoft 365, you configure a data loss prevention (DLP) policy named Policy1. Policy1 detects the sharing of United States (US) bank account numbers in email messages and attachments.

Policy1 is configured as shown in the exhibit. (Click the

You need to ensure that internal users can email documents that contain US bank account numbers to external users who have an email suffix of contoso.com.

What should you configure?

- A. an action
- B. a group
- C. a condition
- D. an exception

**Answer: D**

Explanation:

Explanation

You need to add an exception. In the Advanced Settings of the DLP policy, you can add a rule to configure the Conditions and Actions. There is also an 'Add Exception' button. This gives you several options that you can select as the exception. One of the options is 'except when recipient domain is'. You need to select that option and enter the domain name contoso.com.
