**NEW QUESTION: 3**

What is the difference between a network switch and a network router?

- A. A network switch enables multiple devices to share the same monitors; a network router enables devices to use multiple monitors.
- B. A network switch connects networks to enable communication; a network router connects devices for communication over Ethernet.
- C. A network switch enables device connections over wireless networks; a network router enables network communications over wireless networks.
- D. A network switch connects devices for communication via Ethernet; a network router connects networks to enable communication between them.

**Answer: D**

**NEW QUESTION: 4**

Project A is being administered using a matrix form of organization. The project manager reports to a senior vice president who provides visible support to the project. In this scenario, which of the following statements best describes the relative power of the project manager?

- A.** The project manager will probably not be challenged by project stakeholders.
- B.** In this strong matrix, the balance of power is shifted to the functional line managers.
- C.** In this strong matrix, the balance of power is shifted to the project manager.
- D.** In this tight matrix, the balance of power is shifted to the project manager.

**Answer: C**

Explanation:

The project manager's ability to influence project decisions increases the higher up he or she \_\_\_\_\_ and the person to whom he or she reports \_\_\_\_\_ is placed in the organization. In the strong matrix, the project manager's authority ranges from moderate to high. [Planning]
