OBIEE - Grain (Level of summarization)
Grain definition in the context of OBIEE.
The following list describes the different grains in navigating a query:
* Aggregation grain. The grain of the aggregate source of from a level based metrics
* Query grain. The grain of the request.
* Time Series grain. The grain at which the time series function aggregation is requested.
* Storage grain. The query in the example can be computed from daily sales or from monthly sales, or from quarterly sales.
Note:
The aggregation grain is defined in the content tab of the logical table source.
When the query grain match the aggregation grain of a logical table source, this one is used to create the physical query.
