NEW QUESTION: 1

Microsoft 365 Advanced Threat Protection
Protection is a cloud-based service that helps protect Microsoft 365 users and their data from advanced threats. It uses machine learning and behavioral analysis to detect and prevent threats that are not caught by traditional security solutions. It is available as a standalone service or as part of Microsoft Defender for Office 365. It can be used to protect email, documents, and other data in Microsoft 365. It can also be used to protect data in other cloud services, such as OneDrive and SharePoint. It is a powerful tool for protecting your organization's data and users from advanced threats.
