Besides, you will have right to free [1z0-1064-22](#) update your Oracle B2B Service 2022 Implementation Professional test dumps

one-year after you purchased.

NEW QUESTION: 1

Your network contains an Active Directory domain named contoso.com. The domain contains a domain controller named DC1 that runs Windows Server 2012 R2.

All client computers run Windows 8 Enterprise.

DC1 contains a Group Policy object (GPO) named GPO1.

You need to deploy a VPN connection to all users.

What should you configure from User Configuration in GPO1?

A. Policies/Administrative Templates/Windows Components/Windows Mobility Center

B. Preferences/Control Panel Settings/Network Options

C. Policies/Administrative Templates/Network/Windows Connect Now

D. Policies/Administrative Templates/Network/Network Connections

Answer: B

Explanation:

Explanation/Reference:

Explanation:

Open the Group Policy Management Console. Right-click the Group Policy object (GPO) that should

contain the new preference item, and then click Edit.

In the console tree under Computer Configuration or User Configuration, expand the Preferences

folder, and then expand the Control Panel Settings folder.

Right-click the Network Options node, point to New, and select VPN Connection.

The Network Options extension allows you to centrally create, modify, and delete dial-up networking and virtual private network (VPN) connections. Before you create a network option preference item, you should review the behavior of each type of action possible with the extension.

NEW QUESTION: 2

Which of the following should NOT be part of the Risk Management Infrastructure?

A. Review continually the application of the Principles of Good Governance to the Risk Management Infrastructure, financial accounting and reporting infrastructure and the organization as a whole

B. Include financial risk management, compliance and external reporting and, to the extent that resources allow, should exclude legal or accounting

C. Be independently staffed and report to an employee who is on the Executive Committee (Operating Committee) but who is NOT a business unit leader

D. Define the organization's definition of risk management as articulated by the Board in clear and uncertain terms

Answer: A

NEW QUESTION: 3

A company is migrating its application to AWS. The application is currently hosted on-premises and uses a load balancer (ALB) to distribute traffic. The application is currently using SSL/TLS for secure communication. The company wants to ensure that the application remains secure during the migration. The company is considering the following options:

A. Use AWS Certificate Manager to create a certificate for the ALB. Use the certificate to configure the ALB to use HTTPS. Use the certificate to configure the application to use HTTPS.

B. Use AWS KMS to create a key for the ALB. Use the key to configure the ALB to use HTTPS. Use the key to configure the application to use HTTPS.

C. Use AWS KMS to create a key for the application. Use the key to configure the application to use HTTPS. Use the key to configure the ALB to use HTTPS.

D. Use AWS Certificate Manager to create a certificate for the application. Use the certificate to configure the application to use HTTPS. Use the certificate to configure the ALB to use HTTPS.

Answer: D
