NEW QUESTION: 1

A customer enrolls in the Open Value Company-wide licensing program.

The customer loses the product key for Windows 7.

You need to tell the customer where to obtain the product key.

Where should the customer obtain the key?

A. the Certificate of Authority (COA) label on the client computer

- B. the Volume Licensing Service Center (VLSC)
- C. the Microsoft Licensing webpage
- D. the proof of license label affixed to the installation disc case inside the Windows package

Answer: B

Explanation:

Licensing Manageability. Manage licenses easily and conveniently through online tracking tools. With the Microsoft Volume Licensing Service Center (VLSC), you can electronically manage your license orders, review purchase history, download volume license keys for software product installation, track compliance, and receive order confirmation information.

NEW QUESTION: 2

Although custom prosthetic bone replacements produced through a new computer-aided design process will cost more than twice as much as ordinary replacements, custom replacements should still be cost-effective. Not only will surgery and recovery time be reduced, but custom replacements should last longer, thereby reducing the need for further hospital stays.

Which of the following must be studied in order to evaluate the argument presented above?

- A. The degree to which the use of custom replacements is likely to reduce the need for repeat surgery when compared with the use of ordinary replacements
- B. The amount of time a patient spends in surgery versus the amount of time spent recovering from surgery
- C. The degree to which custom replacements produced with the new technique are more carefully manufactured than are ordinary replacements
- D. The amount by which custom replacements produced with the new technique will drop in cost as the production procedures become standardized and applicable on a larger scale
- E. The amount by which the cost of producing custom replacements has declined with the introduction of the new technique for producing them

NEW QUESTION: 3

Your company uses a proprietary encryption algorithm to secure sensitive data. A custom cryptographic assembly was developed in Microsoft .NET and is used in several applications.

A SQL Server Integration Services (SSIS) package is importing

data into a Windows Azure

SQL Database database. Some of the data must be encrypted with the proprietary encryption algorithm.

You need to design the implementation strategy to meet the requirements while minimizing development and deployment effort and maximizing data flow performance.

What should you do?

A. Create a SQL Common Language Runtime (SQLCLR) stored procedure that uses the custom assembly to encrypt the data, deploy it in the Windows Azure SQL Database database, and use it when inserting data.

B. Use an SSIS Script task that uses the custom assembly to encrypt the data when inserting it.

C. Use an SSIS Script transformation that uses the custom assembly to encrypt the data when inserting it.

D. Create a SQL Common Language Runtime (SQLCLR) function that uses the custom assembly to encrypt the data, deploy it in the Windows Azure SQL Database database, and use it when inserting data.

Answer: C
