Besides, we arrange experts to check [NS0-527 Latest Exam Preparation](#) the update every day to ensure the latest study resource.

NEW QUESTION: 1

AWS Elastic Load Balancer supports SSL termination.

- A. True. For specific regions only
- B. True. For specific availability zones only.
- C. True. For all regions
- D. False

Answer: C

Explanation:

You can configure your load balancer in ELB (Elastic Load Balancing) to use a SSL certificate in order to improve your system security. The load balancer uses the certificate to terminate and then decrypt requests before sending them to the back-end instances. Elastic Load Balancing uses AWS Identity and Access Management (IAM) to upload your certificate to your load balancer.
