NEW QUESTION: 1

Which of the following sections come under the ISO/IEC 27002 standard?

- A. Financial assessment
- B. Security policy
- C. Asset management
- D. Risk assessment

Answer: B,C,D

Explanation:

ISO/IEC 27002 is an information security standard published by the International Organization for Standardization (ISO) and by the International Electrotechnical Commission (IEC) as ISO/IEC 17799:2005. This standard contains the following twelve main sections: 1.Risk assessment: It refers to assessment of risk. 2.Security policy: It deals with the security management. 3.Organization of information security: It deals with governance of information security. 4.Asset management: It refers to inventory and classification of information assets. 5.Human resources security: It deals with security aspects for employees joining, moving and leaving an organization.

6. Physical and environmental security: It is related to protection of the computer facilities. 7. Communications and operations management: It is the management of technical security controls in systems and networks. 8. Access control: It deals with the restriction of access rights to networks, systems, applications, functions and data. 9. Information systems acquisition, development and maintenance: It refers to build security into applications. 10. Information security incident management: It refers to anticipate and respond appropriately to information security breaches. 11. Business continuity management: It deals with protecting, maintaining and recovering business-critical processes and systems. 12. Compliance: It is used for ensuring conformance with information security policies, standards, laws and regulations. Answer C is incorrect. Financial assessment does not come under the ISO/IEC 27002 standard.

NEW QUESTION: 2

You are the administrator for a new VMware installation and you have an application that is running within a virtual machine that creates a high amount of inbound traffic. This traffic seems to be affecting other virtual machines on the same virtual switch.

What can you do to reduce the impact to the peer virtual machines?

- A. Use a standard switch with traffic shaping configured
- B. Use a standard switch with Network I/O Control configured
- C. Use a distributed switch with traffic shaping configured
- D. Use a distributed switch with Netflow enabled

Answer: C

NEW QUESTION: 3

Answer:

Explanation:

Explanation

Box 1:

Box 2:

Box 3:

In Box 3 we must use `Name.Equals`, not `Object.Equals`, to properly compare two strings.

Incorrect:

Not Box 3: `Object.Equals (obj, obj)` compares the REFERENCE (true if they point to same object). Two strings, even having the same value will never have the same reference. So it is not applicable here.
