E. Configure the IP address of Host B as 10.1.2.2.
F. Configure the IP address of Host A as 10.1.2.2.
Answer: D,E
Explanation:
The switch 1 is configured with two VLANs: VLAN1 and VLAN2.
The IP information of member Host A in VLAN1 is as follows:
Address : 10.1.1.126
Mask : 255.255.255.0
Gateway : 10.1.1.254
The IP information of member Host B in VLAN2 is as follows:
Address : 10.1.1.12

Answer: B

NEW QUESTION: 4
You have a cartridge that defines three stages of decomposition. The first stage contains order components that represent functions, the second stage contains order components that represent target systems, and the third stage contains order components that represent granularities. You want to define decomposition rules that always apply the same granularity to a function, independent of the target system that this function is communicating to. How would you design these decomposition rules such that it is easy to maintain them in the future evolutions of your system topology?
A. one decomposition rule for each target system, having this target system as the source order component and the granularity as the target order component
B. a single decomposition rule with the function as the source order component and the granularity as the target order component
C. a single decomposition rule that has all target systems as source order components and the granularity as the target order component
D. a single decomposition rule that has only the target systems used by the function as source order components and the granularity as the target order component
E. one decomposition rule for each target system used by the function, having this target system as the source order component and the granularity as the target order component
Answer: C
