Answer: A,B
Explanation:
Explanation - Namespaces are not used in unmanaged packages. In
fact, even if your organization is namespace, the namespace is
removed from all components when it is uploaded as an unmanaged
package.

ing
Once the components are installed from an unmanaged package,
the components can be edited in the organization they are
installed in. The developer who created and uploaded the
unmanaged package has no control over the installed components,
and can't change or upgrade them.
