Answer: C
Explanation:
Explanation
The Cloud Trail event history allows to view events which are recorded for 90 days. So one can use a metric filter to gather the API calls from 11 days ago.
Option A and C is invalid because Cloudwatch is used for logging and not for monitoring API activity Option D is invalid because AWSConfig is a configuration service and not for

monitoring API activity For more information on AWS Cloudtrail, please visit the following URL:
https://docs.aws.amazon.com/awscloudtrail/latest/usereuide/how-cloudtrail-works.html Note:
In this question we assume that the customer has enabled cloud trail service.
AWS CloudTrail is enabled by default for ALL CUSTOMERS and will provide visibility into the past seven days of account activity without the need for you to configure a trail in the service to get started. So for an activity that happened 11 days ago to be stored in the cloud trail we need to configure the trail manually to ensure that it is stored in the events history.

Search the Cloudtrail event history on the API events which occurred 11 days ago.

NEW QUESTION: 4
Scenario:
You have been asked by your customer to help resolve issues in their routed network. Their network engineer has deployed HSRP. On closer inspection HSRP doesn't appear to be operating properly and it appears there are other network problems as well. You are to provide solutions to all the network problems.

Examine the configuration on R4. The routing table shows no entries for 172.16.10.0/24 and
172.16.20.0/24. Identify which of the following is the issue preventing route entries being installed on R4 routing table?
A. HSRP issue between R4 and R2
B. The distribute-list configured on R4 is blocking route entries
C. This is an OSPF issue between R4 and R2
D. This is a DHCP issue between R4 and R2
E. The ACL configured on R4 is blocking inbound traffic on the interface connected to R2
Answer: B
Explanation:
If we look at the configuration on R4 we see that there is a distribute list applied to OSPF, which blocks the
172.16.20.0/24 and 172.16.10.0/24 networks.
