**NEW QUESTION: 1**

You are in a meeting with a customer discussing VMAX3 engine scalability. What is the maximum number of engines that can be configured on a VMAX 200K?

- A. 0
- B. 1
- C. 2
- D. 3

**Answer: C**

**NEW QUESTION: 2**

Which of the following is a continuity plan test that uses actual resources to simulate a system crash to cost-effectively

obtain evidence about the plan's effectiveness?

- A. Preparedness test
- B. Walk-through
- C. Paper test
- D. Post test

**Answer: A**

Explanation:

A preparedness test is a localized version of a full test, wherein resources are expended in the simulation of a system crash. This test is performed regularly on different aspects of the plan and can be a cost-effective way to gradually obtain evidence about the plan's effectiveness. It also provides a means to improve the plan in increments. Incorrect answers:

A. A paper test is a walkthrough of the plan, involving major players in the plan's execution who attempt to determine what might happen in a particular type of service disruption. A paper test usually precedes the preparedness test.

B. A post-test is actually a test phase and is comprised of a group of activities, such as returning all resources to their proper place, disconnecting equipment, returning personnel and deleting all company data from third-party systems.

D. A walk-through is a test involving a simulated disaster situation that tests the preparedness and understanding of management and staff, rather than the actual resources.

### **NEW QUESTION: 3**

Your company has 20 web APIs that were developed in-house. The company is developing 10 web apps that will use the web APIs. The web apps and the APIs are registered in the company's Azure Active Directory (Azure AD) tenant. The web APIs are published by using Azure API Management.

You need to recommend a solution to block unauthorized requests originating from the web apps from reaching the web APIs. The solution must meet the following requirements:

- \* Use Azure AD-generated claims.
- \* Minimize configuration and management effort.

What should you include in the recommendation? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

### **NEW QUESTION: 4**

The PRIMARY purpose of audit trails is to:

- A. improve response time for users.

- B. establish accountability and responsibility for processed transactions.
- C. provide useful information to auditors who may wish to track transactions
- D. improve the operational efficiency of the system.

**Answer: B**

Explanation:

Enabling audit trails helps in establishing the accountability and responsibility of processed transactions by tracing transactions through the system. The objective of enabling software to provide audit trails is not to improve system efficiency, since it often involves additional processing which may in fact reduce response time for users. Enabling audit trails involves storage and thus occupies disk space. Choice D is also a valid reason; however, it is not the primary reason.
