NEW QUESTION: 1

While configuring the Manage Indexes Rebuild Wizard, a Symantec Enterprise Vault 10 .0 for Exchange Power Administrator decides to verify the schedule for indexing activity to avoid server resource conflicts. However, the administrator is unable to locate the Index Administration task. What is the problem?

- A.** The Index Administration task must first be created by the Power Administrator.
- B.** The user should be logged on to the Enterprise Vault server as the Vault Service Account.
- C.** The administrator has insufficient permissions to list or view the tasks.
- D.** The Index Administration task appears after the first time an indexing task is run.

Answer: D

NEW QUESTION: 2

Amazon EC2 instances in the us-east-1 region are running in a VPC. The VPC has a public subnet and a private subnet. The public subnet is connected to the Internet via an Internet Gateway. The private subnet is not connected to the Internet. A user wants to launch an Amazon EC2 instance in the private subnet. The user wants to use the instance to access the Internet. The user wants to use the instance to access the Internet. The user wants to use the instance to access the Internet.

LEAST effort to launch the instance and allow it to access the Internet?

- A. Launch the instance in the public subnet and use a NAT gateway to allow it to access the Internet.
- B. Launch the instance in the private subnet and use a NAT gateway to allow it to access the Internet.
- C. Launch the instance in the public subnet and use a NAT gateway to allow it to access the Internet.
- D. Launch the instance in the private subnet and use a NAT gateway to allow it to access the Internet.

Answer: A

Explanation:

Principal - Control what the person making the request (the principal) is allowed to do based on the tags that are attached to that person's IAM user or role. To do this, use the aws:PrincipalTag/key-name condition key to specify what tags must be attached to the IAM user or role before the request is allowed.

https://docs.aws.amazon.com/IAM/latest/UserGuide/access_iam-tags.html

- A: This would be too disruptive and Organizations should be used instead.
- B: Question did not say if prod\dev\test are in separate VPC or not. It could be separated using business units instead. Hence this is not feasible.
- D: This is too much effort and disruption.

NEW QUESTION: 3

Wo können Sie den Standardlagerort für die Materialkomponente
