Topic 1, Fabrikam inc.

Overview

Fabrikam. Inc. is an international manufacturing company that has 5,000 employees. The company has sales, marketing research and human resources departments.

Fabrikam has two main offices and three branch offices. The main offices are located in New York and London. The branch offices are located in Seattle, Montreal, and Paris.

The offices connect to each other by using a WAN link. Each office connects directly to the Internet. The WAN connections from the main offices to the branch offices are reliable.

Existing Environment

Exchange Environment

The Exchange Server organization contains servers that have either Exchange Server 2010 or Exchange Server 2013 installed. Each main office contains two Exchange Server 2013 servers. Each branch office contains one Exchange Server 2010 server.

MX records are configured to deliver email to offices in New York and London. Email is delivered to the London office only if the New York office is unavailable.

Each office is configured to use a separate namespace for client access. The New York office is configured to use a namespace of mail.fabrikam.com.

The servers in the New York and London offices are members of a database availability group (DAG). Each mailbox database in the New York and London offices has three copies.

The technical support staff in the branch offices have administrative access to the existing Exchange servers and are assigned Organization Management permissions.

Users from the sales department frequently send email messages that contain the Social Security number of customers in the United States.

Problem Statements

Fabrikam identifies the following issues on the network:

- \* Users in the Paris office report that when launching Microsoft Outlook, they receive a security alert indicating a certificate name mismatch. The security alert is not generated when they connect to Outlook Web Access. Users from the other offices do not report receiving the security alert.

\* Network administrators report that the mailbox databases in the New York office sometimes activate on the Exchange servers in the London office, resulting in poor performance for the New York office users.

#### Planned Changes

Fabrikam plans to implement the following changes to the network:

\* Upgrade the organization to Exchange Server 2016 during the next six months.

\* Enable online document viewing and editing from Outlook on the web.

#### High Availability Requirements

Fabrikam identifies the following high-availability requirements for the planned deployment:

\* Mailbox databases that contain mailboxes for the New York office users must only be activated on the servers in the London office manually.

\* All client access connections to the London and New York offices must use load-balanced namespaces. The load balancing mechanism must perform health checks.

#### Security and compliance requirements

Fabrikam identifies the following security and compliance requirements:

\* After the planned upgrade, the maximum mailbox size must be 5 GB.

\* Administrators from the branch offices must be able to view the mailbox properties and reset the passwords of the users, but must be prevented from changing the mailbox database configurations.

\* Users who are involved in legal disputes with customers must be prevented from permanently deleting email messages pertaining to the dispute. The users must be able to delete all other messages permanently.

\* If a user enters a Social Security number in an email message addressed to an external recipient, the user must receive a notification before sending the message. If the user sends the message, the message must not be delivered. A compliance officer must be notified of the violation.

#### Connectivity requirements

Fabrikam identifies the following connectivity requirements:

\* Connections for inbound and outbound email must be initiated and terminated from an Edge Transport server in the perimeter network.

\* All external client connections from the branch office users must be proxied from the New York office to the branch offices.

\* The number of namespaces used for client access must be minimized.

#### **NEW QUESTION: 2**

You have been asked to come up with a subnet mask that will allow all three web servers to be on the same network while

providing the max number of subnets. Which network address and subnet mask meet this requirement?

- A. 192.168.252.8 255.255.255.248
- B. 192.168.252.8 255.255.255.252
- C. 192.168.252.0 255.255.255.252
- D. 192.168.252.16 255.255.255.252
- E. 192.168.252.16 255.255.255.240

**Answer: A**

### NEW QUESTION: 3

- A. RST
- B. SYN ACK
- C. PSH, ACK
- D. ACK

**Answer: A**

### NEW QUESTION: 4

Sie entwickeln eine Microsoft SQL Server 2012-Datenbank, die Tabellen mit den Namen Employee und Person enthält. Die Tabellen haben folgende Definitionen:

Benutzer können in dieser Ansicht einzelne INSERT-Anweisungen oder INSERT ... SELECT-Anweisungen verwenden.

Sie müssen sicherstellen, dass Benutzer mithilfe der Ansicht "VwEmployee" mit einer einzigen Anweisung Datensätze in die Tabellen "Employee" und "Person" einfügen können.

Welche Transact-SQL-Anweisung sollten Sie verwenden?

- A. 

```
CREATE TRIGGER TrgVwEmployee
ON VwEmployee
STATTEINFÜGEN
WIE
START
INSERT INTO Person (ID, Vorname, Nachname)
SELECT ID, Vorname, Nachname, FROM eingefügt
INSERT INTO Employee (PersonId, EmployeeNumber)
SELECT Id, EmployeeNumber FROM eingefügt
ENDE
```
- B. 

```
CREATE TRIGGER TrgVwEmployee
ON VwEmployee
STATTEINFÜGEN
WIE
START
DECLARE @ID INT, @FirstName NVARCHAR (25), @LastName NVARCHAR
(25), @PersonID INT, @EmployeeNumber NVARCHAR (15) SELECT @ID =
ID, @FirstName = Vorname, @LastName = Nachname, @EmployeeNumber
= EmployeeNumber
FROM eingefügt
INSERT INTO Person (ID, Vorname, Nachname)
```

```

WERTE (@ID, @FirstName, @LastName)
INSERT INTO Employee (PersonID, EmployeeNumber)
WERTE (@PersonID, @EmployeeNumber
Ende
C. CREATE TRIGGER TrgVwEmployee
ON VwEmployee
STATTS EINFÜGEN
WIE
START
INSERT INTO Person (ID, Vorname, Nachname)
SELECT ID, Vorname, Nachname FROM VwEmployee
INSERT INTO Employee (PersonID, EmployeeNumber)
SELECT Id, EmployeeNumber FROM VwEmployee
Ende
D. CREATE TRIGGER TrgVwEmployee
ON VwEmployee
FÜR EINSATZ
WIE
START
INSERT INTO Person (ID, Vorname, Nachname)
SELECT ID, Vorname, Nachname, FROM eingefügt
INSERT INTO Employee (PersonID, EmployeeNumber)
SELECT Id, EmployeeNumber FROM eingefügt
ENDE

```

**Answer: A**
