¼Ÿ

A. ã•¯ã•„

B. ã•„ã•„ã•^

Answer: A

Explanation:
We use the Azure Premium Key Vault with Hardware Security
Modules (HSM) backed keys.
The Key Vault has to be in the same region as the VM that will
be encrypted.
Note: If you want to use a key encryption key (KEK) for an
additional layer of security for encryption keys, add a KEK to
your key vault. Use the Add-AzKeyVaultKey cmdlet to create a
key encryption key in the key vault. You can also import a KEK
from your on-premises key management HSM.

NEW QUESTION: 2

A. Option B
B. Option C
C. Option A
D. Option D
Answer: B
Explanation:
The Branch2 network is communicating to the Server farm, which is connected to R2, via
GRE Tunnel so we should check the GRE tunnel first to see if it is in "up/up" state with the
"show ip interface brief" command on the two routers.
On Branch2:

On R2:

We see interfaces Tunnel0 at two ends are "up/up" which are good so we should check for the routing part on two routers with the "show running-config" command and pay attention to the static routing of each router. On Branch2 we see:

R2_show_run_static.jpg
The destination IP address for this static route is not correct. It should be 192.168.24.1
(Tunnel0's IP address of R2), not 192.168.24.10 -> Answer C is correct.
Note: You can use the "show ip route" command to check the routing configuration on each router but if the destination is not reachable (for example: we configure "ip route 10.10.10.0 255.255.255.0 192.168.24.10" on Branch2, but if 192.168.24.10 is unknown then Branch2 router will not display this routing entry in its routing table.

NEW QUESTION: 3
In the RIP routing protocol, the following mechanism for reducing the routing from the ring is the correct statement
A. Split horizon means only the elimination of the self-loop between two routers have a role
B. self-loop in order to reduce the consequences of routing, RIP protocol specifies the maximum number of hops
C. triggered updates to a certain extent, to avoid routing loops occur
D. Set the time may lead to suppression of the slow convergence

of routing
Answer: A,B,C,D

NEW QUESTION: 4
You are modifying a blog site to improve search engine readability.
You need to group relevant page content together to maximize search engine readability.
Which tag should you use?
A. <div>
B. <nav>
C. <span>
D. <article>
Answer: D
Explanation:
