To our potential customers, you should not miss our NSE5_EDR-5.0 study guide materials, Fortinet NSE 5 - FortiEDR 5.0 valid braindumps book include most related questions together with accurate answers.

Do not think too much.

NEW QUESTION: 1
Assume you would like to receive notification from the container as a stateless session bean transitions to and from the ready state.
Which of the following life cycle back annotations would you use? (Choose one.)
A. @PreConstruct, @PostDestroy
B. @PostConstruct, @PreDestroy
C. @PostConstruct, @PreDestroy, @Remove
D. @PostConstruct, @PostDestroy
E. @PostConstruct, @PostDestroy, @Remove
Answer: B

Explanation:
The Lifecycle of a Stateless Session Bean The EJB container typically creates and maintains a pool of stateless session beans, beginning the stateless session bean's lifecycle. The container performs any dependency injection and then invokes the method annotated @PostConstruct, if it exists. The bean is now ready to have its business methods invoked by a client.
At the end of the lifecycle, the EJB container calls the method annotated @PreDestroy, if it exists.
The bean's instance is then ready for garbage collection.
Lifecycle of a Stateless Session Bean:

Note: An enterprise bean goes through various stages during its lifetime, or lifecycle. Each type of enterprise bean (stateful session, stateless session, singleton session, or message-driven) has a different lifecycle.

NEW QUESTION: 2
Refer to the exhibit.

A network administrator assumes a task to complete the connectivity between PC A and the File Server.
Switch A and Switch B have been partially configured with VLAN 10, 11, 12, and 13. What is the next step in the configuration?
A. Add PC A to VLAN 10 and the File Server to VLAN 11 fa VLAN segmentation
B. Add a router on a stick between Switch A and Switch B allowing for Inter-VLAN routing.
C. Add PC A to the same subnet as the Fie Server allowing for intra-VLAN communication.
D. Add VLAN 13 to the trunk links on Switch A and Switch B for VLAN propagation
Answer: D

NEW QUESTION: 3
All of the following are objectives of credit management EXCEPT:
A. initiating collection procedures.
B. maintaining up-to-date records of accounts receivable.
C. evaluating customer creditworthiness.
D. preparing cash flow forecasts.
Answer: D

NEW QUESTION: 4

HOTSPOT
Case Study
This is a case study. Case studies are not limited separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.
To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other question on this case study.
At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next sections of the exam. After you begin a new section, you cannot return to this section.
To start the case study
To display the first question on this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.
Current environment
Overview
You are the SharePoint administrator for a manufacturing company named Contoso, Ltd. You have the following environments:

Each site collection uses a unique content database.
Details
Dallas
You configure a My Sites host site collection at the URL http://Dallas.contoso.com/personal. The Dallas site collection also hosts a web application that will be used exclusively by sales department employees for creating customer sites. Employees access the site at the URL http://customer.contoso.com.
Chicago
The Chicago location has a primary datacenter and a secondary datacenter.
Denver
Some of the sites in the Denver site collection run in SharePoint 2010 mode.
Atlanta
The Atlanta site collection is used exclusively by marketing department employees.
Detroit

The development site collection is used only by SharePoint administrators for internal testing.

Seattle

The IT site collection is used by the IT department to share content with other employees. The following servers are available in the Seattle datacenter:

Server1 and Server5 are located in the Seattle perimeter network. End users have direct access only to

these servers.

Server2and Server6 are optimized for high throughput.

Server3 and Server7 have storage that is optimized for caching.

Server4 and Server8 are not currently in use.

The servers in the Seattle datacenter are not configured for redundancy.

Office 365

You have an existing Office 365 tenant. You use Azure Active Directory Connect to provision the hosted environment.

Requirements

Chicago

You identify the following requirements for the Chicago office:

General requirements

Chicago must remain a standalone on-premises SharePoint environment. There must be no

connectivity with Office 365.

You must deploy a new Office Online Server farm named oos-chi.contoso.com to the environment. This

farm will be used from within the network and externally. All connections to the Office Online Server farm must use IPSec.

Disaster recovery requirements

You must use the secondary datacenter in Chicago for disaster recovery.

You must be able to recover the Chicago.contoso.com SharePoint farm to the secondary datacenter.

Any recovery operations must complete in less than five minutes if the primary datacenter fails.

You must minimize the costs associated with deploying the disaster recovery solution.

Dallas

You identify the following requirements for the Dallas office:

General requirements

You must configure the Dallas SharePoint farm as a hybrid environment with the Office 365 tenant.

You must support OneDrive for Business, Site following,

Profiles, and the Extensible app launcher.

You must minimize the number of servers that you must add to the environment.

You must grant users only the minimum permissions needed.

You must ensure thathttp://dallas.contoso.com/personalsite is only used for employee personal sites.

Only farm administrators are permitted to create site collections in thehttp://Dallas.contoso.comweb

applications.
Requirements for sales department employees
Sales users must be able to create child sites under thehttp://customer.contoso.comweb application.

Sales users must be able to create site collections.

Seattle
You must implement a new SharePoint environment. Employees in the IT department will use the environment to share content with other employees. You identify the following requirements for the Seattle office:
General requirements
You must configure the farm by using MinRole.

You must implement redundancy.

Employees must be able to search all content in the farm.

Office 365-specific requirements
You must support only OneDrive for Business and Profiles.

You must minimize the number of servers thatyou must add to the environment.

Other requirements
Atlanta
You must deploy a new SharePoint farm at the Atlanta office.
The farm must meet the following requirements:
The farm must be highly available.

Operating systems must support file system encryption.

Search databases must be stored on a file system that automatically repairs corrupt files.

Content databases must be stored on file systems that support the highest level of scalability.

Boston

You must upgrade the existing SharePoint farm to SharePoint 2016. Employees who use the farm must be able to continue using the farm during the upgrade process.
Denver
You must perform a database check before you upgrade SharePoint.
SQL Server
All SharePoint environments must use dedicated SQL Servers.

TheAtlanta SharePoint farm must use SQL AlwaysOn and a group named SP16-SQLAO.

The Atlanta SQL environment must use a SQL alias named SQL.

Office 365
You must use Active Directory Import to synchronize any on-premises SharePoint environments with the Office 365 tenant.
You need to configure the hybrid SharePoint environments.
In the table below, identify the features that you must deploy to each environment.
NOTE: Make only one selection in each column. Each correct selection is worth one point.
Hot Area:

Answer:
Explanation:

Explanation/Reference:
Dallas: You must support OneDrive for Business, Site following, Profiles, and the Extensible app launcher (= Hybrid Site Features)
Seattle: You must support only OneDrive for Business and Profiles (= Hybrid OneDrive for Business).
