- A. ã•ã•"
- B. ã•,,ã•,,ã•^

Answer: B

Explanation:

Instead you should customize the default synchronization rule.
Note:

To delete a custom domain name, you must first ensure that no resources in your directory rely on the domain name. You can't delete a domain name from your directory if:

- * Any user has a user name, email address, or proxy address that includes the domain name.
- * Any group has an email address or proxy address that includes the domain name.
- * Any application in your Azure AD has an app ID URI that includes the domain name.
