NEW QUESTION: 1

Your company identifies the following business continuity and disaster recovery objectives for virtual machines that host sales, finance, and reporting application in the company's on-premises data center.

*The finance application requires that data be retained for seven years. In the event of a disaster, the application must be able to run from Azure. The recovery in objective (RTO) is 10 minutes,

* The reporting application must be able to recover point in-time data at a daily granularity. The RTO is eight hours.

*The sales application must be able to fail over to second on-premises data center.

You need to recommend which Azure services meet the business community and disaster recovery objectives.

The solution must minimize costs.

What should you recommend for each application? To answer, drag the appropriate services to the correct application. Each service may be used once or more than once. You may need to drag the spin bar between panes or scroll to view content.

Answer:

Explanation:

Explanation

NEW QUESTION: 2

Which of the following aspects of security is solely the responsibility of the cloud provider?

- A. Personal security of developers
- B. Regulatory compliance
- C. Physical security
- D. Operating system auditing

Answer: C

Explanation:

Explanation/Reference:

Explanation:

Regardless of the particular cloud service used, physical security of hardware and facilities is always the sole responsibility of the cloud provider. The cloud provider may release information about their physical security policies and procedures to ensure any particular requirements of potential customers will meet their regulatory obligations. Personal security of developers and regulatory compliance are always the responsibility of the cloud customer. Responsibility for operating systems, and the auditing of them, will differ based on the cloud service category used.

NEW QUESTION: 3

Gamma Bank provides a \$100,000 loan to Big Bath retail stores at 5% interest rate (paid annually). The loan also has an annual expected default rate of 2%, and loss given default at 50%. In this case, what will the bank's

expected loss be? What is the expected loss of this loan?

- A. \$300
- B. \$550
- C. \$750
- D. \$1,050

Answer: D

NEW QUESTION: 4

What is the highest numbered TCP/IP port?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: C

Explanation:

There are 65535 possible ports officially recognized. Note: TCP uses the notion of port numbers to identify sending and receiving applications. Each side of a TCP connection has an associated 16-bit unsigned port number assigned to the sending or receiving application. Ports are categorized into three basic categories: well known, registered and dynamic/private. The well known ports are assigned by the Internet Assigned Numbers Authority (IANA) and are typically used by system-level or root processes. Well known applications running as servers and passively listening for connections typically use these ports. Some examples include: FTP (21), TELNET (23), SMTP (25) and HTTP (80). Registered ports are typically used by end user applications as ephemeral source ports when contacting servers, but they can also identify named services that have been registered by a third party. Dynamic/private ports can also be used by end user applications, but are less commonly so. Dynamic/private ports do not contain any meaning outside of any particular TCP connection. com
