NEW QUESTION: 2

DRAG DROP

You have an Exchange Server 2013 organization.

Your company identifies the following security requirements:

Users must be able to send encrypted email messages that can only be decrypted by the intended recipient.

All email messages sent by a user named User1 to an external recipient must be protected by using TLS.

All SMTP sessions to a remote SMTP host named SMTP1 must be encrypted.

You need to recommend which technology must be used to meet each requirement.

Which technologies should you recommend? (To answer, drag the appropriate technologies to the requirements in the answer area. Each technology may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.)

Answer:

Explanation:

NEW QUESTION: 3
