NEW QUESTION: 1
You are developing an application that uses many small images for various aspects of the interface.
The application responds slowly when additional resources are being accessed.
You need to improve the performance of the application.
What should you do?
A. Convert the images to .png file format and stream all images on a single connection.
B. Host all images on an alternate server and provide a CDN.
C. Preload all the images when the client connects to ensure that the images are cached.
D. Combine all the images into a single image and use CSS to

create sprites.
Answer: B

NEW QUESTION: 2
Which Cisco resource provides partners with pre-tested and
flexible solutions that mitigate risk and provide investment
protection for their customers?
A. Smart Designs
B. Cisco Capital
C. Cisco Small Business NFR Program
D. SMB University
E. Quote Builder
Answer: A

NEW QUESTION: 3
In application triggering what is the role of trigger monitor
process?
A. It monitors the initiation queue and based on trigger
message issues a command to start an application.
B. It monitors the application queue and when the trigger
conditions are met, it creates a message and puts it on
initiation queue.
C. It monitors the transmission queue and based on trigger
message issues a command to start an application.
D. It monitors the application queue and when the trigger
conditions are met and issues a command to start an
application.
Answer: A

NEW QUESTION: 4
Cloud Service Provider and Cloud Customer are jointly
responsible for ownership of the all risks in shared
responsibility model for security across all service models.
A. True
B. False
Answer: B
Explanation:
This is false. This is again a tricky question and one should
be careful when answering this type of question. It is the
cloud customer is who is ultimately responsible for the
ownership of risk in the cloud environment. Consumer just
passes some of risk management responsibilities to the cloud
service provider.
