#### **NEW QUESTION: 1**

Information about the project must be distributed to all stakeholders. Which of the following process outputs is used to

report the status and cost of project activities?

- A. Project records
- B. Status reports
- C. Work performance information
- D. Issue logs

**Answer: C**

Explanation:

You create one of the most important outputs of your entire project when the team is doing the project work. Work Performance Information tells you the status of each deliverable in the project, what the team's accomplished, and all of the information you need to know in order to figure out how your project's going. But you're not the only one who needs this your team members and stakeholders need to know what's going on, so they can adjust their work and correct problems early on.

**NEW QUESTION: 2**

**Answer:**

Explanation:

Explanation

Accelerate your business processes by automating information

extraction. Form Recognizer applies advanced machine learning to accurately extract text, key/value pairs, and tables from documents. With just a few samples, Form Recognizer tailors its understanding to your documents, both on-premises and in the cloud.

Turn forms into usable data at a fraction of the time and cost, so you can focus more time acting on the information rather than compiling it.
