NEW QUESTION: 4

You have a Bing Search service that is used to query a product catalog.

You need to identify the following information:

* The locale of the query

* The top 50 query strings

* The number of calls to the service

* The top geographical regions of the service

What should you implement?

A. Azure Application Insights

B. Azure Monitor

C. Azure API Management (APIM)

D. Bing Statistics

Answer: D

Explanation:

The Bing Statistics add-in provides metrics such as call volume, top queries, API response, code distribution, and market distribution. The rich slicing-and-dicing capability lets you gather deeper understanding of your users and their

usage to inform your business strategy.
