NEW QUESTION: 1Using art to condemn the moral shortcomings of society is nothing new. English artist William Hogarth (1697 - 1764) was renowned for prints that revealed the moral lapses of eighteenth-century England. Despite the fact that Hogarth enjoyed the patronage of England's wealthier citizens, he did not shrink away from producing scathing depictions of all levels of English society. In the ten-print series Industry and Idleness, Hogarth presents two apprentices who begin working

side by side only to arrive at vastly different ends. The first apprentice is portrayed as a morally incorruptible, diligent worker. He is promoted, marries his boss's daughter, and achieves great distinction and financial success. The other apprentice does little work and engages in many unsavory activities. He is fired from his apprenticeship and continues down a path of illicit behavior and corruption. The series comes to a climax when the two former coworkers are reunited with the industrious apprentice - now elevated to alderman - standing in judgment of the idle coworker brought before him for murder. The idle apprentice is sentenced to death and executed, whereas the industrious apprentice goes on to become Lord Mayor of London. Among Hogarth's most popular series was The Rake's Progress, which tells the story of wealthy Tom Rakewell. In the first of eight prints, Tom inherits a large sum of money that he foolishly spends on enhancing his image and prestige in superficial ways. His prodigal ways lead to his rapid decline as he is arrested for debt and in return marries an old maid for her money. He begins gambling, is imprisoned, and eventually goes insane in Bedlam. Tom's descent and desperate outcome, like many of Hogarth's subjects, is tied directly to moral corruption and poor self-discipline. It is interesting that Hogarth's prints were extremely popular in his day. Whatever the moral shortcomings of eighteenth-century England, its citizens welcomed Hogarth's social critiques and harsh judgments. According to the passage, Hogarth's prints **A.** portrayed many different kinds of moral corruption. **B.** were extremely controversial. **C.** are extremely valuable today. **D.** often offended his wealthy patrons. **E.** focused on the weak and disenfranchised. **Answer: A** Explanation: Explanation/Reference: Explanation: The passage states that Hogarth's prints were "scathing depictions of all levels of English society," and it offers examples of several different kinds of moral corruption (the apprentice who "engages in many unsavory activities" and the wealthy Tom Rakewell who spends his money foolishly, marries for money, and gambles). Because of these examples, you know choice b is incorrect. Hogarth's work may have been controversial (choice c), but this is not indicated in the passage. The passage also does not imply that his works offended his wealthy patrons (choice d). You might also infer that his works are very valuable (choice e), but the passage does not mention this either.

NEW QUESTION: 2 Welche der folgenden Technologien könnte implementiert werden, um die Anrufklarheit bei Verwendung der VoIP-Technologie zu verbessern? **A.** Caching-Engines **B.** Statische IP-Adressierung **C.** Portweiterleitung **D.** QoS **Answer: D**

NEW QUESTION: 3 Scenario Additional Information During the initiation stage the Project Manager met with the Marketing Director to find out more about the requirements of the promotional calendar and recorded the following notes: There has been a reduction in the order numbers at the MNO Manufacturing

due in part to the increased marketing activities of its competitors. 10% of customers have not re-ordered in this financial year and staff morale is poor. A number of skilled staff have left as a result and replacement staff have not been recruited due to the reduced operation. If the project is successful, a recruitment campaign will be required to fill the existing staff vacancies and there may be a requirement for additional staff. Operational costs are likely to increase because skilled staff are expensive and difficult to find. In financial terms, there were a total of 1,500 orders in the last financial year, each with an average profit of £2k. The Marketing department believes that sending a promotional calendar to our current and prospective customers would increase orders by at least 10% with a minimum of 10 further orders from the list of prospective customers within 12 months from the date of distribution. The Marketing Director will be funding the project from the business marketing budget. She believes that the effect of a good company image portrayed by a successful calendar would last into a second year. She has forecast the same increase in orders for a second year and predicts that the annual employee satisfaction survey will show a measurable improvement in staff morale. A number of alternatives were explored, including: 20% discount for all repeat customers - not cost-effective and very short term; a promotional calendar as a free Christmas gift - would target current and prospective customers and the benefits would last into a second year; a series of television and press advertisements - was too expensive; a direct mail shot to all customers - benefit would be short term; creation of an internet website - would not suit all customers. The calendar is seen as the favored option, as long as the company's competitors do not increase their marketing activity. Whilst the Marketing department wants a very high quality, glossy product, the project management team must be aware of the cost this will incur. Using the Project Scenario and the additional Information provided for this question in the Scenario Booklet, answer the following question. Lines A to E in the table below consist of an assertion statement and a reason statement. For each line identify the appropriate option, from options A to E, that applies. Each option can be used once, more than once or not at all.
