So the one minute earlier you get the Associate - Information Storage and Management Exam practice [New Braindumps NCS-Core Book](#) material pdf, the more opportunities come to you, They compile each answer and question carefully.

**NEW QUESTION: 1**

Amazon EC2 instances are configured with Auto Scaling. A user reports that the instances are not scaling properly. The user provides the following information:

- The instances are in the `us-east-1` region.
- The instances are in the `us-east-1` availability zone.
- The instances are in the `us-east-1` region.
- The instances are in the `us-east-1` availability zone.
- The instances are in the `us-east-1` region.
- The instances are in the `us-east-1` availability zone.

**A.** The instances are in the `us-east-1` region.  
**B.** The instances are in the `us-east-1` availability zone.  
**C.** The instances are in the `us-east-1` region.  
**D.** The instances are in the `us-east-1` availability zone.

**Answer: B**

**NEW QUESTION: 2** You need to meet the security requirements for User3. The solution must meet the technical requirements. What should you do? To answer, select the appropriate options in the answer area. **NOTE:** Each correct selection is worth one point.

**Answer:** Explanation: Explanation\* User3 must be able to manage Office 365 connectors.\* The principle of least privilege must be used whenever possible. Office 365 connectors are configured in the Exchange Admin Center. You need to assign User3 the Organization Management role to enable User3 to manage Office 365 connectors. A Global Admin could manage Office 365 connectors but the Organization Management role has less privilege. Reference:

<https://docs.microsoft.com/en-us/office365/SecurityCompliance/ep/feature-permissions-in-eop> Topic 2, Fabrikam, Inc This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case.

However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided. To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study. At the end of this case study, a review screen will appear. This screen allows you to review your answer and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section. To start the case study To display the first question in this case study, click the button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. When you are ready to answer a question, click the Overview Fabrikam, Inc. is an electronics company that produces consumer products. Fabrikam has 10,000 employees worldwide. Fabrikam has a main office in London and branch offices in major cities in Europe, Asia, and the United States. Existing Environment Active Directory Environment The network contains an Active Directory forest named fabrikam.com. The forest contains all the identities used for user and computer authentication. Each department is represented by a top-level organizational unit (OU) that contains several child OUs for user accounts and computer accounts. All users authenticate to on-premises applications by signing in to their device by using a UPN format of [\[email&#160;protected\]](#). Fabrikam does NOT plan to implement identity federation. Network Infrastructure Each office has a high-speed connection to the Internet. Each office contains two domain controllers. All domain controllers are configured as a DNS server. The public zone for fabrikam.com is managed by an external DNS server. All users connect to an on-premises Microsoft Exchange Server 2016 organization. The users access

their email by using Outlook Anywhere, Outlook on the web, or the Microsoft Outlook app for iOS. All the Exchange servers have the latest cumulative updates installed. All shared company documents are stored on a Microsoft SharePoint Server farm.

**Requirements** Planned Changes Fabrikam plans to implement a Microsoft 365 Enterprise subscription and move all email and shared documents to the subscription. Fabrikam plans to implement two pilot projects:

- \* Project1: During Project1, the mailboxes of 100 users in the sales department will be moved to Microsoft 365.
- \* Project2: After the successful completion of Project1, Microsoft Teams & Skype for Business will be enabled in Microsoft 365 for the sales department users.

Fabrikam plans to create a group named UserLicenses that will manage the allocation of all Microsoft 365 bulk licenses.

**Technical Requirements** Fabrikam identifies the following technical requirements:

- \* All users must be able to exchange email messages successfully during Project1 by using their current email address.
- \* Users must be able to authenticate to cloud services if Active Directory becomes unavailable.
- \* A user named User1 must be able to view all DLP reports from the Microsoft 365 admin center.
- \* Microsoft Office 365 ProPlus applications must be installed from a network share only.

Disruptions to email address must be minimized.

**Application Requirements** Fabrikam identifies the following application requirements:

- \* An on-premises web application named App1 must allow users to complete their expense reports online.
- \* The installation of feature updates for Office 365 ProPlus must be minimized.

**Security Requirements** Fabrikam identifies the following security requirements:

- \* After the planned migration to Microsoft 365, all users must continue to authenticate to their mailbox and to SharePoint sites by using their UPN.
- \* The memberships of UserLicenses must be validated monthly. Unused user accounts must be removed from the group automatically.

After the planned migration to Microsoft 365, all users must be signed in to on-premises and cloud-based applications automatically. The principle of least privilege must be used.

**NEW QUESTION:** 3A network administrator is asked to send a large file containing PII to a business associate. Which of the following protocols is the BEST choice to use?

**A. SMTP** **B. SSH** **C. FTP** **D. SFTP**

**Answer: D**

**Explanation:** SFTP encrypts authentication and data traffic between the client and server by making use of SSH to provide secure FTP communications. As a result, SFTP offers protection for both the authentication traffic and the data transfer taking place between a client and server.

**Incorrect Answers:**

- A. SSH is employed by SFTP.
- C. SMTP is the email-forwarding protocol used on the Internet and intranets.
- D. Standard FTP does not provide any confidentiality protection because it sends all data in the clear.
