The most amazing thing about the product is its user-friendly interface.

NEW QUESTION: 1Scenario: A Citrix Administrator needs to set up a new provisioning environment. The administrator builds and configures two Provisioning Servers to support 200 target devices. All of the target devices are configured to start up using vDisks that are caching in device HD. Network Engineering

mandates that the administrator configure the TFTP service and DHCP scope to assign IP addresses to all the target devices. When the administrator tries to start any target devices, the machines hang and show the error in the attached exhibit. Click the Exhibit button to view the error message. Which action could the administrator take to resolve this issue? **A.** Configure the correct VLAN ID for the target devices. **B.** Assign a vDisk to the target devices. **C.** Set the firewall to allow UDP 67 and 68. **D.** Enable DHCP options 66 and 67. **Answer: A**
