NEW QUESTION: 1 To which object can you link a budget register entry workflow?
A. Budget models
B. Journal names
C. Budget codes
D. Budget transfer rules
Answer: C
Explanation: You can associate budget register entry workflows with any of the budget codes that have been set up to identify the budget types. After you assign a workflow to a budget code, all budget register entries that use that budget code require workflow approval before you can update budget balances.

NEW QUESTION: 2 Which option is needed to earn the Cisco Compatible credential for Cisco Compatible Extensions Lite? **A.** Foundation and Management are required. **B.** Voice is required. **C.** Foundation and Voice are required. **D.** Foundation is required. **E.** Location is required. **F.** Foundation and Location are required. **G.** Management is required. **H.** Location and Management are required.

Answer: D
Explanation: Historically, there have been five versions of the Cisco Compatible Extension (CCX) specification labeled Version 1 (V1) to Version 5 (V5). Each version built upon its predecessors. For example, CCXv5 added MFP, real-time reporting between client and AP, a diagnostic channel to help troubleshooting clients and optional location services, and improved several CCXv4 features. Each version contains a list of features. In summer 2011, Cisco separated the CCX features into four subfamilies to help vendors integrate only those features that are needed for their specific wireless clients (called application-specific devices, which are devices built for a specific function [for example, barcode scanners or VoWLAN phones] and therefore do not need all the CCX features that a data laptop would need). This is called the CCX Lite program, with four components: Reference: CCNA Wireless (640-722 IUWNE) Quick Reference Guide page 78

NEW QUESTION: 4 A code, as is pertains to cryptography: **A.** Deals with linguistic units. **B.** Is a generic term for encryption. **C.** Is specific to transposition ciphers. **D.** Is specific to substitution ciphers. **Answer: A**
Explanation: Historically, a code refers to a cryptosystem that deals with linguistic units: words, phrases, sentences, and so forth. Codes are only useful for specialized circumstances where the message to transmit has an already defined equivalent ciphertext word.
